

2023 J&J SPI Market Vegas Tournament Match Procedures

- A coin flip will determine choice for the diddle. The winner of the diddle will be the home team and will start the first game. Each game after that will rotate home and visitor as the team to go first except for the tiebreaker game.
- Both team captains will go to the board to set up the match. **Make sure you are choosing the correct category for the match you are getting ready to shoot, whether it be a winners or losers match or tiebreaker game.** You may change your player order when you are setting up the match, but that will only affect the first game. You may not change your team order once the match has started.
- Once a match has been started, you may not cancel the match and start over without the approval of a tournament director.
- If there is a need to shoot a tiebreaker game, the diddle process will be used to determine which team will be the home team. Make sure that you choose the tiebreaker game upon setup. You may choose your player order for the tiebreaker game.
- If the match ends without it being a tie, please use the exit league feature to get out of the match once a winner has been determined.
- The winner of the match will take the match sheet to the stage, scan the winner's side of the sheet and put the scanned sheet into the box provided at the scanning station.
- All divisions are double elimination.
